TCS Event Rentals Provides Seating for VIP Viewing During Historic Launch of NASA's New Orion Spacecraft

TCS Event Rentals, of Burlington, NC, recently provided VIP seating for NASA's historic launch and spaceflight test of the new Orion Spacecraft on December 5, 2014.

TCS delivered two 10-Row Mobile Bleacher System units to Cape Canaveral Air Force Station in Florida. Each of the completely portable 10-Row units features a 236 person seating capacity.

“While there are other companies that offer mobile bleacher units for special events, we feel our years of experience and expertise with these types of events are key reasons we are one of the nation's leading go-to sources for events of this nature,” stated Edwin Scott, *Chief Operating Officer of TCS Event Rentals*. “Our clients count on our equipment being of top quality and cleanliness – but also on being where they are supposed to be, when they are supposed to be. Plus, these are highly secure events, and our past reputation working with various governmental agencies on events of similar stature and public exposure provides them with a level of comfort in knowing we are uniquely equipped for just this type of event.”

TCS Event Rentals, a division of *The TES Group*, is one of the largest providers of tables, chairs and staging for special events in the eastern United States. With an inventory of over 100,000 chairs and 5,000 tables, and over 15,000 sq. ft. of staging, TCS also offers crowd control barriers, fixed and mobile bleacher units, portable restrooms/comfort stations and much more.
